Real Techno Corp Plus gives the top of line reliability on transactions during operating on Binance smart chain-based Blockchain system. It is non-proprietary and decentralized, with the agreement accomplished utilizing proof of stake. It has been instigated with a robust concentration on decentralization and expandability and it allows absolute seclusion. Real Techno Corp Plus has a gigantic ecosystem that involves a launchpad, swap exchange, DeFi ecosystem, NFT marketplace, Gamefi, exchange, and many other elements to make the Real Techno Corp Plus well organized. So, Real Techno Corp Plus is the most indispensable part of the RTCP ecosystem.

► What is GameFi

Decentralized games have constituents of DeFi. DeFi platforms have a game-way process. GameFi is a frankenword of decentralized gaming and finance that delineates a convergence of cryptocurrencies, non-fungible tokens (NFTs), and the play-to-earn (P2E) gaming structure. The confluence of gaming and DeFi present in two procedures:

1. Decentralized games having constituents of DeFi.
2. DeFi platforms have a game-way process.

While decentralized games are integrated with DeFi components to introduce financial paths for gamers, DeFi platforms are gamified with the target of creating financial services more enjoyable and connecting for the audience by utilizing board game/video game components like scoring, leaderboards, competitions, rewards, badges, avatars, and real-time response.

► Why is Real Techno Corp Plus a Gaming Token?

Open : You don't require to put in for any single thing or "open" an account. You just get way in by making a wallet.

Alias : You don't require to give your name, email address, or any personal details.

Adaptable : You can progress your possessions anywhere at any time, without asking for authorization, or waiting for lengthy transfers to be accomplished, and spending costly fees.

Fast : Interest Rates and benefits often upgrade speedily (as swiftly as every 15 seconds), and can be outstandingly larger than old wall street.

Crystal Clear : Everyone included can observe the whole set of transactions (one's own companies hardly ever provide that type of liquidity).

➤ How does GameFi operate?

GameFi is described by its "play-to-earn" business structure and generally indicates block chain-rooted games that provide monetary incentives to players. This denotes that players get financial rewards for playing these games and promoting them via their levels. The incentives obtained mainly involve NFTs, in-game tokens, and crypto currency. When players obtain in-game tokens, they can transform them into other more famous crypto's like Ethereum and Bitcoin, which can then be exchanged for fiat currency.

➤ MISSION

- To try on unlatching Real Techno Corp Plus capability and creating Real Techno Corp Plus uncomplicated to utilize.
- To make Real Techno Corp Plus marketplace with all-around reach.
- To give contemplation to the financial benefits and security of every individual participants.
- To ease the capability of the purchaser-trader to transact a wallet in the most reliable way.

➤ VISION

- To make Real Techno Corp Plus an international marketplace where purchasers and traders can purchase, sell, and trade RTCP in most dependable and protected manner.
- To work out the alive issues of consumers in a way that create business trouble-free.

➤ Core Values

Be Exceptional. We are productive and kind first and foremost. Our focal objective is to make cheerfulness in other lives. Be Humanitarian, we attempt to be as granting as we can feasibly be, supporting our circle as

much as we can. Be Crystal-Clear, we attempt to be guileless and communicative with our circle at every times, for the advantage of all.

➤ Environment

Real Techno Corp Plus is an organization that targets to carry out revolution and originality in the gaming, DeFi, services, NFT, sports, forex, and crypto trading industry via its block chain technology. The environment of Real Techno Corp Plus is very wide and immense as it is rooted in BSC which makes it more indispensable for the people connected with the agriculture and food industry.

➤ Binance Blockchain Technology

A decentralized non-proprietary software blockchain-based operating system with nimble-witted capacity, proof-of-stake postulates for its agreement procedure, and a cryptocurrency specific to the system called Binance is a decentralized, non-proprietary blockchain-based operating system (BSC).

➤ Operating of Binance Smart Chain

Binance is established on a few indispensable conceptions, the most essential of which is decentralization. All data on the blockchain is entirely uncontrolled and is not under the administration of a central power. Content makers can obtain Binance in return for sharing their effort. Furthermore, developers can make their own coins on the Binance network. These tokens can then be utilized in the network's user-created decentralized apps (dApps). Binance's foremost token is utilized to back the freshly issued tokens. The network's eventual step of growth is to support Binance-based games. These games would be entirely decentralized, with users guerdoning authors straightly if they loved the game. Binance's agreement algorithm is designated to a deputed proof of stake. In this system, transactions are validated by 27 super assignees who are accountable for retaining the transaction history. Super assignees are selected every six hours and indemnified with a Binance coin made by the system. In every three seconds, a new block is annexed to the Binance blockchain.

➤ Advantages of Binance Blockchain

Binance does not introduce a charge for asset transfers. It assists traders and purchasers via its fee transactions, encourages, and delivers the optimal business surrounding. The network can manage up to 2000 transactions per second. Adaptability and the capability to transform online media are fortified by such transactional capability. This is the main achievement compared to Ethereum (25 transactions) or Bitcoin (3-6 Transactions). You can make dApps. You can earn digital possessions by making a dApp on the network and

providing content on it. These can be in common Binance you made Binance backs that. As a consequence, you may be indemnified for your attempts in progressing the app and its content. If you don't want to make your own dApps, you can still explore the wide collection thus far made.

➤ Encourages Creators

Binance trusts it is indispensable to aid content possessors more productively, and a network is an astounding option. Most possibly you will enjoy reading digital content. Because content makers allow you to be content while watching, it is only upright that they are indemnified properly for their attempts.

➤ Unnamed Transactions

Transactions on the Binance network are unnamed, but only on the network independently. The operation of buying BND and the need of utilizing an exchange signifies that you will have to demonstrate your recognition to buy Binance tokens in the fiANT place. Transactions can, Although, be executed namelessly once on the network. Moreover, it should be acknowledged that all Blockchain reserves a record of all transactions that occur on the chain. As a consequence, no transaction can ever be genuinely nameless.

➤ Secured

Real Techno Corp Plus has robust fame in the cryptocurrency sphere. The quantity of money disbursed by the organization on safety and the employees it has employed determines this, As with other cryptocurrencies, for the reason that it is a decentralized network, the person carries a gigantic reasonableness for shielding their tokens. With regards to the network as an entity, there has yet to be a safety infringement.

➤ Proof of Stake

Observing as cryptocurrencies are decentralized and not managed by banks, they need a path to corroborate transactions. Proof of stake is a well-known technique (PoS). Proof of stake is an agreement procedure for cryptocurrencies. By wagering their coins, cryptocurrency possessors can check the latest transactions and annex them to the blockchain. This technique returns proof of work, the fiANT cryptocurrency agreement technique. Proof of stake has developed in prevalence as perturbs about the ecological influence of crypto mining have developed. Proof of stake is essential for cryptocurrency speculators. These are some instances of cryptocurrencies that utilize it. Possessors of a cryptocurrency can venture coins and make their own verifier nodes utilizing proof of stake structure. Staking is the activity of guaranteeing your coins to be utilized for transaction corroboration. They are secured while you stake your coins, but you can unstack them if you need

to trade them. When a block of transactions is set to be operated, the proof of stake agreement for the cryptocurrency chooses a verifier node to inspect the block. The verifier corroborates the correctness of the block's transaction. If this is the event, they annexed the block to the Blockchain and receive cryptocurrency as a bounty for their attempts. If a verifier brings forward annexing a block with inaccurate detail, they will be castigated by losing some of their staked belongings.

➤ Why Real Techno Corp Plus?

➤ Nought Human Factor-

The human factor is not taken into contemplation. The smart contract is not hanged on anyone, and there is no path to avert the platform from operating.

➤ Referral Provides -

There are no out-of-sight fees, and all funds are carried between members without the requirement of any mediators. The contract balance is always a minus number.

➤ Longevity of Conditions -

Nobody has the power to disallow you from the platform for the reason that the contract does not comprise a contingency for such a limitation.

➤ Decentralization -

In place of having controllers or directors in charge, there are only makers who are representatives of the group on the platform, just like everyone else.

➤ Immediate Transactions -

Benefits obtained by other members are transferred straightly into your individual wallet. There is no cheap stake in the system, and all your profits are yours to reserve.

➤ Lucidity and Namelessness -

For the reason the smart contract code is common, anyone can see the entire background of all transactions. This makes certain that the situations are unmixed and the platform statistics are precise.

➤ Foundation

Digital money-raising may also benefit from Blockchain, as foundations can obtain donations in a reliable, lucid, and international method without comprising to pay currency exchange shares. - Legal/ Digital token listing

► ROADMAP

Q2 2022

1) Whitepaper

We will give an enumeration representation & details by utilizing Whitepaper so that interested speculators can obtain essential knowledge.

2) Staking Program Instigation

For token possessors, it is a path for obtaining rewards by staking Real Techno Corp Plus

3) Listing on secure platforms such as pancake swap,

Q3 2022

1) Listing on various platforms

Q4 2022

1) IDO, IGO & NFT

we will introduce IDO, IGO & NFT launchpads to instigate the latest coins and crypto projects and elevate financial resources.

2) Real Techno Corp Plus SWAP

By utilizing this consumers can swap and work their token very effortlessly & get inducement for every swap.

Q1 2023

1) NFT Marketplace

This will aid users to Purchase and Sell their specific digital possessions.

2) Blindbox Sell

Out fiANT game NFT Blindbox will initiate for sale.

3) NFT staking program

For NFT possessors, it is a path of obtaining rewards for gripping NFT.

4) Real Techno Corp Plus Gamefi

Here more enthusiasm will come to the Real Techno Corp Plus community & play to earn game will begin.

Q2 2023

The latest Road Map will comprise a trading exchange, a freelance platform, Real Techno Corp Plus Matelending, Real Techno Corp Plus blockchain & many more projects.

➤ What Is Decentralization?

DeFi is a combined title for financial products and services that are obtainable to individuals who can utilize Ethereum - anyone having an internet connection. With the help of DeFi, the bazaars are open all time and there are no amalgamated officials who can hinder payments or refuse your way into everything. Services that were earlier moderate and at the peril of human error are mechanized and secure now that they've managed by code that anyone can examine and investigate.

- An international, open replacement to the ongoing financial system.
- Items that let you sponge, store, speculate, sell, and more.
- Centered on non-proprietary software that can be operated by anyone effortlessly.

➤ Sharp-Witted Contract

Binance Blockchain was created to smooth communications. It promises uncomplicated amalgamations with a vast variety of ultra-modern programming languages. Binance is created as a threefold system. It comprises a core layer, a storage layer, and an application layer. Impressively, each and every layer is upgraded to carry out a specific set of tasks. It is the core layer that supervises the handling of Binance sharp-witted contracts. Decentralized Finance or DeFi has emanated as a gigantic thing around the globe. It has the capability to produce excellent conclusions to each and everything if applied appropriately. In very less time, this technology has shown robust expectations and thus far produced very magnificent results in various sectors. The DeFi Binance token is the latest theory that is obtaining a lot of allurements and providing organizations an opportunity to be more productive.

➤ Initial Coin Offering (ICO)

Initial Coin Offering has developed into one of those blockchain development services that require no representation or recognition. What began with a full of perplexity has now grown into one of the most loved and favored means of seeking support (funds) at this time. ICO has come to light as a blessing for every business person in recent years. With this extensive raising money program, you are capable to eventuate your business objective in an uncomplicated way.
